Products highlights

Now that baby has experienced different tastes and textures, GERBER Wheat Biscuit Baby Cereal is perfect for little ones 8 months and older. With the smell, taste and texture of biscuit, feel good knowing every serving contains calcium, iron, and other essential nutrients that support baby's normal growth and development and probiotics to support a healthy gut flora. Since our cereals already contain milk, all you have to do is add water for quick, super convenient, and wholesome goodness. Made with no added sugar or salt**, and with no preservatives, artificial colours or flavours. Pair with a GERBER Veggie and Fruit Purée for extra nutrition.

We have updated our GERBER cereals packaging to match the rest of our Gerber family products. As part of our on-going commitment to provide the best nutrition for your growing little one, we have made changes to our cereal recipes, which is reflected in the Nutrition Facts Table and Ingredient List. Some of the changes include a reduction in sugar* and the removal of palm olein. As a result, you might notice our textures of the new cereals are different as we have adjusted our preparation instructions to suggest adding more or less water to get the perfect texture for your baby.

*All cereals excluding GERBER Multigrain Yogurt Apple Pear Banana (Stage 3)

**All cereal-based foods for babies under 12 months should not contain salt
